

Did you know...

...that we want to welcome all the new students at our University.

...that our University is 95 years old.

...that there is a 360° virtual campus tour of our university available at the website.

... that from next year there will be an extra student psychologist.

Recap Academic Year 21-22

Another academic year has passed, and a lot has happened. When we started this year, corona at first seemed to be almost over. TOP week could happen again, and students could finally go outside and meet each other. Unfortunately, not much later, corona came back. Thankfully, this time it didn't last as long as the previous times and students have been able to go back to campus and the city for already a long period of time. COVID-19 has had a great impact on our society. Yet we also learned some great lessons from it in terms of education, such as the change from physical lectures in lecture halls to online lectures via zoom. We are now figuring out the balance between online and offline lectures and the University is taking steps to become a university where blended learning is implemented. We have also had to deal with less pleasant things this year. The war in Ukraine has concerned our university. For example by means of a support fund where humanitarian goods could be brought to, but also a waiver for all Ukrainian students so they can continue studying here at Tilburg University. After looking back at last year, we also want to look ahead to next year. There are also good initiatives coming up in the coming years. For example, the basic grant that will be reintroduced after next year, and the sports center that will be expanded with good facilities! We want to wish everyone a good summer break and till next year.

Campus Tilburg University

For every new student at Tilburg University or for students who are still clueless at this point, this edition of the pleekrant includes a campus guide which shows you essential places you need to know as a TiU student! If you are looking for a quiet place to study on campus, the Library (L) is the perfect place. Besides the Library there are also study places in C, Cube, G, M, RT, D, T and MD. Don't forget to book your spot through <https://tilburguniversity.libcal.com>. Furthermore, our university also has a wide range of sports you can take advantage of. With a membership you are able to practise more than 58 sports. It is also possible to join one of the 24 sports associations. In addition, there are plenty of food facilities across the campus. In the restaurant building (R) there is an international kitchen and many places to sit. Besides that you can also get food and drinks in C, M, E and Cube.

The campus is also going to change in the coming years. Last university council we discussed the Campus Vision 2040. This vision focuses on a sustainable campus that stimulates the sense of community and connection. Many buildings will be renovated and new ones will be built. The goal is to have a fully circular and CO2 neutral campus by 2040. There will be a completely new sports center, places like Mindlabs and Deprez in the middle of the city center and a new education building next to the cube. The table below shows all the projects for the coming years.
